

Innovative Research Program on Suicide Countermeasures in FY2020: Report on Commissioned Research Results

**Field 2: Improving support tools for local governments**

**Topic number : 2-1**

Research topic:

Research on Promotion of Utilization of Statistical Data in Public Administration

Principal Researcher:

Hiroe Tsubaki

Professor Emeritus of ISM, The Institute of Statistical Mathematics (ISM), Inter-University Research Institute Corporation Research Organization of Information and Systems (ROIS)

Co-Researcher:

Kazuhiro Minami

Professor, Department of Statistical Data Science, The Institute of Statistical Mathematics (ISM), Inter-University Research Institute Corporation Research Organization of Information and Systems (ROIS)

Mayumi Oka

Project Associate Professor, Research Center for Medical and Health Data Science, The Institute of Statistical Mathematics (ISM), Inter-University Research Institute Corporation Research Organization of Information and Systems (ROIS)

Motoi Okamoto

Chief URA / Project Associate Professor, Office of Strategic Planning, Inter-University Research Institute Corporation Research Organization of Information and Systems (ROIS)

Isao Takabe

Visiting Associate Professor, Risk Analysis Research Center, The Institute of Statistical Mathematics (ISM), Inter-University Research Institute Corporation Research Organization of Information and Systems (ROIS)

Satoshi Yamashita

Professor / Vice Director-General / Director of the Risk Analysis Research Center, The Institute of Statistical Mathematics (ISM), Inter-University Research Institute Corporation Research Organization of Information and Systems (ROIS)

Keita Yamauchi

Professor, Graduate School of Health Management, Keio University

Michiko Watanabe

Professor, Graduate School of Health Management, Keio University

Visiting Professor, Research Center for Medical and Health Data Science, The Institute of Statistical Mathematics (ISM), Inter-University Research Institute Corporation Research Organization of Information and Systems (ROIS)

Summary:

In order to promote the utilization of public microdata at an on-site facility, based on which we can pursue comprehensive suicide countermeasures quantitatively, we developed useful analytic techniques and a software tool for statistical disclosure control that protects sensitive information in published analysis results. In addition, we held a series of online workshops via ZOOM giving tutorial lectures on an overview of the on-site use program, useful techniques for data analysis, and statistical disclosure control. We recorded those lectures and developed educational materials for online courses, which serve as useful guideline guidelines for future researchers in this field.
